Tuesday 3rd of February, 2026

Vol.1

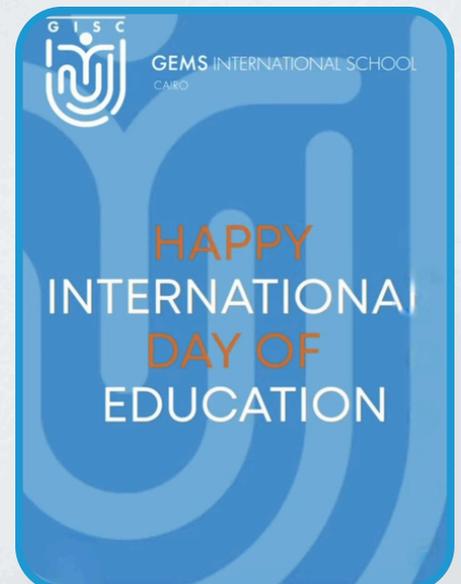

Theme of the month digital Safety.

Dear GISC Community,

February will center on digital safety, connection, inquiry, and global thinking. Learning will extend well beyond the classroom as students will engage in meaningful experiences that reflect the true spirit of the IB. During International Week, students will explore cultures, perspectives, and traditions, strengthening their international-mindedness and sense of global citizenship. The Innov8 Competition will further showcase our commitment to innovation and collaboration, bringing together more than 20 schools, including our sister schools from Egypt and KSA, as well as other participating schools beyond our platform. As we approach Ramadan, our community will come together to celebrate the values of reflection, empathy, and respect, reinforcing the importance of social and emotional learning. Together, these experiences will highlight not just what our students learn but why IB education matters, preparing balanced, thoughtful, and future-ready learners.

رمضان كريم

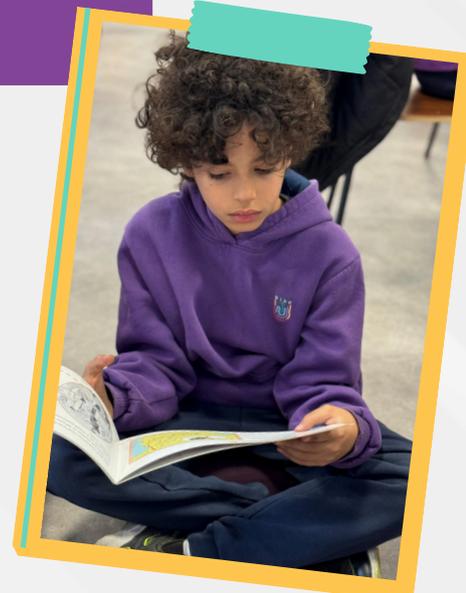

Early Years In Action!

Early Years learning is intentionally planned and developmentally appropriate. The Learning Showcase highlighted play-based inquiry that supported language development, social-emotional growth, and early communication skills, aligned with the IB Early Years framework.

Our PYP learners

Reflecting on January, PYP classrooms were alive with inquiry and engagement through in-class activities, assemblies, trips, and the PYP Parents master class. These experiences supported students in exploring concepts, sharing their learning, and building confidence.

🌟 MYP Learning in Action

We are proud to recognize our MYP students for their achievements in Individuals and Societies. Through inquiry-based learning, students demonstrated academic excellence, positive behavior, responsibility, and a strong commitment to learning. One highlight saw students become young historians by interviewing their parents as primary sources, gaining first-hand insights into real-life experiences and extending learning beyond the classroom and into their homes. Their curiosity, respect, and dedication truly reflect the IB learner profile as they continue to strive for excellence. ✨

DP Skills in Practice

DP students brought learning to life across subjects. In German B, they reflected on identity and personal experiences; in Chemistry, they explored molecular geometry through hands-on investigations; and in English A, collaborative posters showcased critical thinking and communication skills. Across all subjects, students demonstrated curiosity, reflection, and collaboration key elements of the IB Diploma Programme.
