

Week in Review

Our Deepest condolences to those that have lost their families in Syria and Turkey as a result of the earthquake.

GISC has contributed to helping all the families that suffered the earthquake effects and support them until the end.

We have received a huge amount of donations with the help of our GISC students that helped in packing and to our GISC family that donated.

We thank you all for the great support!

PYP2 students are using Kodable programming.

Kodable has been used in over 50% of US Elementary Schools engaging millions of kids with a fun, no-nonsense set of games that teach the basics of coding, logical thinking, and more.
